

Top Discharge Dewatering Pumps

R Series

R Series Submersible Pumps

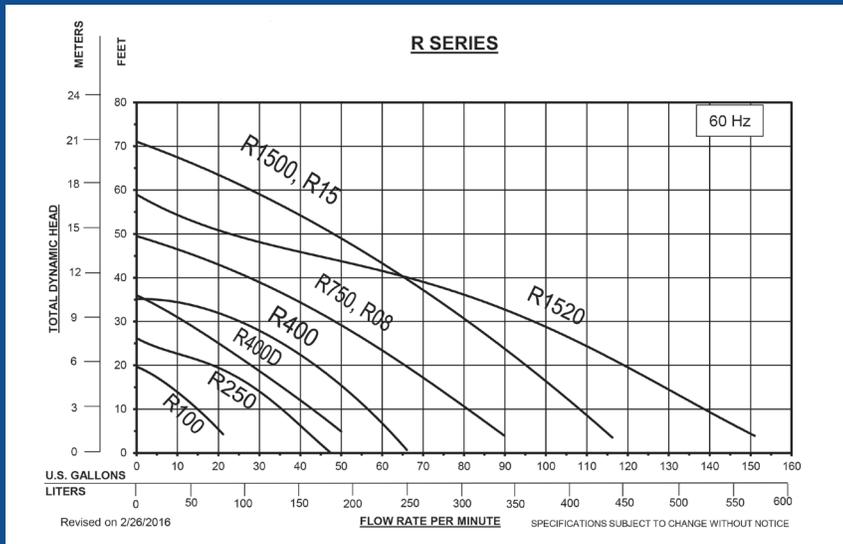

Maximize your production and uptime with BJM Pumps® R Series dewatering pumps for construction and industrial applications. These top discharge pumps are lightweight and compact for excellent performance and quality.

The Mop-Up® pump is an R Series pump that is perfect for mopping up after flooding and cleaning up spills in basements, businesses, industrial plants and other areas. These pumps can be started in a small puddle and can pump down to 1/12th of an inch.

Key Benefits of the R Series

The following benefits help to minimize downtime and maintenance costs:

- Top discharge for better motor cooling and slim line design
- 304 stainless steel motor housing for superior heat transfer
- Winding protection and (NEMA) Class F insulation protect motor from temperatures up to 230°F
- High temperature automatic overload switch protects against motor failure due to overheating
- Cast iron construction stands up to rough handling and sandy water
